Detailed Action

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim(s) are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

✓ A. Claim 3 recites the limitation "Figure II" in line 2, page 1 of the amendment 7A.

There is insufficient antecedent basis for this limitation in the claim.

✓ B. Claim 2 recites the limitation "Figure I" in line 2, page 11. There is insufficient antecedent basis for this limitation in the claim.

✓ C. Claim 4 recites the limitation "Figure III and/or Table I" in line 2, page 2 of the amendment 7A. There is insufficient antecedent basis for this limitation in the claim.

✓ D. Claim 5 recites the limitation "Figure IV and/or Table II" in line 2, page 2 of the amendment 7A. There is insufficient antecedent basis for this limitation in the claim.

✓ E. In claim 9, page 11, line 1, the phrase "characterized in" is indefinite. The term "wherein" is suggested.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains.

Patentability shall not be negated by the manner in which the invention was made.

✓ Claims 1-10, 14 are rejected under 35 U. S. C. 103(a) as being unpatentable over Patel (See Reference N). Patel. al. teaches the instant compound, 5-[4[2-(N-,ethyl-N-2-pyridyl)amino)ethoxy]Benzyl]Thiazolidine-2, 4-dione. At pages 1-13, see the instant compound

The difference between the prior art compound and the instantly claimed compound is that the claimed compound is a polymorph of the Patel compound. A polymorph is a solid crystalline phase of a given compound resulting from the possibility of at least two different arrangements of the molecules of that compound in the solid state. The instant compound discloses the infrared spectrum, Raman spectrum, NMR, and X-ray diffraction pattern for 5-[4[2-(N-,ethyl-N-2-pyridyl)amino)ethoxy]Benzyl]Thiazolidine-2, 4-dione. The Patel reference does not disclose such data for 5-[4[2-(N-,ethyl-N-2-pyridyl)amino)ethoxy]Benzyl]Thiazolidine-2, 4-dione.

It would have been obvious to one of ordinary skill in the art to create a polymorph of the infra red spectrum, Raman spectrum, NMR, and X-ray diffraction pattern for 5-[4[2-(N-,ethyl-N-2-pyridyl)amino)ethoxy]Benzyl]Thiazolidine-2, 4-dione that does not show unexpected properties from the known compound. Accordingly, the compounds are deemed unpatentable there from in the absence of a showing of unexpected results for the claimed compounds over those of the generic prior art compounds.
